PREFACE

The following quotations from the Preface to the Preliminary Edition (1948) provide an excellent springboard for presenting the First Edition of the ARMY MEDICAL LIBRARY CLASSIFICATION:

"The Survey Report on the Army Medical Library, published in 1944 and sponsored by the American Library Association through funds from the Rockefeller Foundation, recommended that the 'Library be reclassified according to a modern scheme.' It went on to say: 'The best classification scheme that could be devised for the Library would be one which combined the notation of the Library of Congress system with the basic plan of the Cunningham classification. Accordingly, permission should be sought to revise the Library of Congress scheme for medicine in this way. If permission cannot be obtained, then a new scheme should be worked out, utilizing the best features of both these classifications.'

"The Rockefeller Foundation provided the funds needed to carry out this recommendation. Mr. Keyes D. Metcalf, Chairman of the Survey Committee and of the resultant Classification Committee, chose Miss Mary Louise Marshall to undertake the compilation of the new classification under the direction of a committee composed of representatives of the Survey Committee, the Library of Congress, and the Army Medical Library ...

"Subsequently, the classification schedules were compiled by Miss Marshall . . . Her work was done in close and constant consultation with physicians. In addition, all available medical classifications, as well as the contents of numerous textbooks in the respective subjects, were studied for arrangement and modern ideas as to inclusiveness in the various fields . . . "

The CLASSIFICATION as prepared by the Committee was a very detailed one because the Committee considered it wiser "to provide detail beyond actual need, in the interest of uniform development. "

Experience in applying the CLASSIFICATION to Army Medical Library materials indicated that a simplification of the schedules would be desirable, both in speeding up the actual process of classifying and in the resulting grouping of materials. Over a period of many months, revision of the schedules was undertaken. The resulting revised and simplified tables were put into operation in October 1949, just three years from the date on which the CLASSIFICATION was first used. The CLASSIFICATION here presented then, is that which is currently being used in the day by day operations of the Library.

To the 1944 Classification Committee, and to all the librarians, physicians, and subject consultants who have assisted in the development of the CLASSIFICATION the Army Medical Library owes a large debt of gratitude.

Classification of Serial Publications	13
Serial Numbering	14
Table G	15
Synopsis	27
Schedules	29
Index	205

At the Army Medical Library, the LCC CLASSIFICATION is applied, subject-wise, to bibliographic material only. Serial publications are separated by form, and are assigned call numbers within general broad categories. For details see page 13.

The headings used for the main topics (e. g., WK, Musculoskeletal System; WG, Cardiovascular System) are given in brief form. They are to be interpreted broadly, as including the physiological system, the specialty or specialties

INTRODUCTION

In presenting the First Edition of the ARMY MEDICAL LIBRARY CLASSIFICATION it seems desirable to present also some information which has been helpful in applying the schedules at the Army Medical Library.

The CLASSIFICATION covers the field of medicine and its related sciences. With it are used the various schedules of the LIBRARY OF CONGRESS CLASSIFICATION in order to provide an orderly arrangement for subjects bordering on medicine and for non-medical reference books. The LC schedules are used extensively; for example, social questions relating to the blind and the deaf are classified in HV (Social Sciences). When classification according to the LC schedules is indicated, only the class letters have been furnished in the present index. Specific numbers for LC classes have been omitted on the theory that each library will determine for itself the amount of specificity it desires in its use of the LC CLASSIFICATION tables. At AML, specific subdivisions of more general classes are used only when it appears that the number of titles to be classified will justify their use.

At the Army Medical Library, the AML CLASSIFICATION is applied, subject wise, to monographic material only. Serial publications are separated by form, and are assigned call numbers within several broad categories. For details see page 13.

The headings used for the main tables (e. g., WE, Musculoskeletal System; WG, Cardiovascular System) are given in brief form. They are to be interpreted broadly, as including the physiological system, the specialty or specialties

connected with it, the regions of the body chiefly concerned, and subordinate related fields. Within the tables, division by organ usually has first priority. Material on a particular disease is classified with the disease (which in turn is classified with the organ or region chiefly affected) regardless of special emphasis on diet, drug, or other specific form of therapy.

Under each main table the numbers 1-32 (as well as in other occasional sections, e. g., WO 201-) have been uniformly assigned, with the exception of minor deviations dictated by the nature of the material. Not all numbers are listed under every table; any now omitted may be interpolated as required.

Classes in the AML schedules are divided geographically by the application of "Table G." The use of geographical breakdown is somewhat restricted, and each class so divided is indicated in the schedules by the phrase (Table G). This table and certain information pertinent to its use will be found on page 15.

Mention must be made of two types of monographic publications which are classified according to special plans: Bibliography, and Nineteenth Century titles.

Bibliography. A bibliography of a subject within the scope of the AML CLASSIFICATION takes the class number for the subject prefixed by a capital Z. For example, a bibliography on the history of surgery will have the classification ZWO 11.

Bibliographies which fall outside the scope of the AML CLASSIFICATION will ordinarily be classed in schedule Z (Bibliography) of the LC CLASSIFICATION.

Bibliographies of serials are classified in ZW 1.

Nineteenth Century Titles. Books published 1801-1913, excepting titles of Americana (WZ 270) and reprints of early titles (WZ 290) are classified according to subject. However, the use of the schedules for this material has been somewhat restricted. The numbers applied to 19th century titles in the Army Medical Library are indicated in the schedules by an asterisk before each such number.

In a very few instances the schedules include numbers which are used only for 19th century titles. These class numbers are marked with a double asterisk (e.g., **W 600 Medical and dental jurisprudence).

QS Human Anatomy. This schedule is used to classify general anatomy and comparative anatomy of man and animals. Anatomy of animals alone goes in LC schedule QL. Anatomy of an organ or region of the human body is classified with other material on the organ or region (e.g., a book on the anatomy of the heart classifies in WG 201).

QT Physiology. This schedule is used according to the plan stated for QS, and is supplemented as needed by LC schedule QP. The latter portions of QT cover broad areas in the field of hygiene.

QV Pharmacology. This table is used for the classification of books on individual drugs regardless of whether they are written from the standpoint of therapeutics or pharmacology. If, however, the title deals with the use of a particular drug in the treatment of a particular disease, it classes with the disease. Books on drug therapy in general are classified in WB 300.

All drugs are classified in QV except: vitamins, which go in QU; endocrine preparations (including synthetic substitutes) which go in WK; and non-endocrine biologicals, which go in QW. The classification of drugs exemplified in Goodman and Gilman, THE PHARMACOLOGICAL BASES OF THERAPEUTICS, is useful in applying schedule QV.

The section beginning with QV 700 is used for classifying books dealing with the general aspects of pharmacy and pharmaceuticals, as contrasted with pharmacodynamics.

QW Bacteriology and Immunology. Books written on a particular species of bacteria are classed with the order to which that species belongs, according to the classification in Bergey's MANUAL OF DETERMINATIVE BACTERIOLOGY. Immunological characteristics of particular bacteria class with the bacteria.

QX Parasitology. Craig and Faust's CLINICAL PARASITOLOGY is helpful in resolving questions of classification in this area.

QY Clinical Pathology. A more descriptive title for this table might be "Clinical Diagnosis by Laboratory Methods."

QZ Pathology. The classification of tumors used in this schedule is taken from a table devised by Lucké and Warren.

This schedule is a good example of the fact that the designation of the QS-QZ portion of the AML CLASSIFICATION as covering the "Pre-clinical sciences" is not entirely accurate, as, for instance, the schedule covers all of the material on cancer in general (QZ 200-).

The classification of materials on neoplasms is often difficult. In some instances, a concept has been assigned a number in the QZ table and also elsewhere in the schedules (e.g., Leukemia, QZ 350 and WH 250). In these cases, classification must be made on the basis of emphasis within the book. Those titles which place emphasis on changes in structure will take the QZ number; those which emphasize disturbances of function, symptomatology, and treatment will take the clinical schedule number. In this connection, it is helpful to remember that the part of table QZ which deals with tumors is developed on the basis of tissues; elsewhere

in the schedules the breakdown is usually on the basis of organs.

WA Public Health. At AML care is exercised to classify in WA only those works in which the medical aspects of the subject are emphasized. Various tables of the LC CLASSIFICATION, notably T (Technology) and H (Social Sciences), are used for public health material in which there is a non-medical emphasis, such as engineering or economics.

WB Practice of Medicine. The section beginning WB 900 provides for the classification of material on special systems of therapeutics. It is to be noted that while a book on chiropractic in general is classed in WB 905, a book which deals specifically with the chiropractic regimen in scarlet fever would classify in WC 214.

WC Infectious Diseases. The principle on which this table is based is that of etiological agent, rather than physiological system, the principle which underlies most of the rest of the schedules. All major systemic infections are to be found in this schedule, with the exception of Tuberculosis, which is in WF, Respiratory Diseases. A few infectious diseases, usually local in character with no systemic involvement, are classed with the part affected (e.g., Impetigo is classed in Dermatology, WR 225).

Some arbitrary arrangements have been made in the table: the grouping of the venereal diseases; the coupling of bacterial and virus pneumonias; and bringing together bacillary and amebic dysentery. If no specific class is found for a relatively obscure and rare disease such as pseudoglanders, such material may be classed on the basis of likeness (i.e., in this case, with glanders).

WD Systemic Diseases. The title of this table was selected because of inability to find a better term. Table WD consists of a series of small tables, beginning with the hundreds blocks (e.g., WD 100 Deficiency Diseases, WD 200 Diseases of Metabolism). These diminutive tables deal with various concepts which cut across the main axes selected for

the framework of the CLASSIFICATION. That they happen to bear the same prefix, WD, is due merely to the fact that it was desirable to conserve the spread of the notational base of the whole classification scheme.

WS Pediatrics. The basis of the table is age group, rather than physiological system, which raises obvious questions such as, should pediatric gynecology be classed with pediatrics or with gynecology? An arbitrary decision has been made: material on the various body systems in children is classed in the WS table; pediatric material dealing with something other than body systems per se is classed outside of WS (e. g., a book on surgery in children would be classed in WO 925). It should also be noted that while a book dealing with respiratory ailments of childhood would class WS 280, a book on pneumonia in infants would class with pneumonia, WC 202.

WY Nursing. The class numbers for nursing in special fields of medicine (WY 151-163) are also applied to textbooks in the special fields which are written for nurses (e. g., Surgery for nurses, WY 161; Surgical nursing, WY 161). In the "pre-clinical" sciences, special texts for nurses class with other general texts (e. g., Bacteriology for nurses, QW 4).

WZ History of Medicine. This schedule contains no subject breakdowns as the history of each medical and clinical subject is classed with each subject, under the form number 11. Examples: WO 11, History of surgery; WC 11, History of typhoid fever (or scarlet fever, or malaria); WW 11, History of ophthalmology and/or optometry.

A fundamental feature of the entire classification scheme for the Army Medical Library is embodied in the classes WZ 220-290 which provide for the arrangement of early materials in century groups, according to date of imprint. Within each class the individual titles are arranged alphabetically by author. Since 19th century materials (1801-1913) are classified on a basis of utilizing only a portion of the available classes, the total effect is that of applying the complete, detailed, classification scheme only to monographs issued since 1914.

CLASSIFICATION OF SERIAL PUBLICATIONS

Serial publications are those which are issued in successive parts and are intended to be continued indefinitely (e.g., periodicals, journals, transactions, annuals, numbered series, and other continuations). They are classified according to type of publication in five categories.*

Category 1. Serials of medical importance, including governmental publications which resemble magazines rather than official documents. These serials are usually indexed in medical and scientific indexes. Classification: W 1.

Category 2. Non-medical serials which are classified according to the LC CLASSIFICATION.

Category 3. Serial publications of medical congresses, whether local, national, or international in scope. Classification: W 3.

Category 4. Serial publications of hospitals regardless of private or public sponsorship. Classification: WX 2.

Category 5. Medical serial publications of governments, except those which are preferred in Category 1. Classification: W 2.

* Exception: Serial publications which are indexes or bibliographies (e.g., CANCER CURRENT LITERATURE and TUBERCULOSIS INDEX) are classified in the bibliography number for the subject covered.

SERIAL NUMBERING

The Army Medical Library uses a special scheme of numbering to insure the alphabetical arrangement of the large number of serials contained in categories 1 (W 1) and 3 (W 3). Under this scheme the first two letters of the main entry are used followed by 3 or 4 numbers according to the number of entries to be numbered. Examples:

W 1 Revista commercial farmacéutica
RE359

W 1 Revista cubana de laboratorio clínico
RE361

W 1 Revue belge de pathologie
RE743

W 3 All-India Pharmaceutical Conference
AL545

W 3 Congrès français de gynécologie
CO258

W 3 Congrès français de stomatologie
CO263

TABLE G

Purpose. The principal use of Table G is in the arranging of serial publications of governments, which take the form class W 2; and hospital publications, which take the form class WX 2. Use of Table G permits a shelving order which is controlled both geographically and alphabetically.

Table G is also used, on a somewhat restricted basis, for geographic grouping of monographs.

General Explanation. Table G is a modified Cutter pattern, adapted for special purposes. It divides the world into ten regions to each of which an identifying letter is assigned:

A - United States	G - Europe	K - Australia
D - America	H - Africa	L - Pacific Islands
F - Great Britain	J - Asia	M - International
P - Polar Regions (used only for monographs)		

Additional numbers may be interpolated into Table G as needed. Variants of place names do not require a change in Table G numbering (e. g., JT3 Siam or Thailand).

Countries and regions, other than the United States, are provided with numerical designation on the basis of medical as well as geographical and political considerations. This means that Table G, in addition to its main purpose, makes provision for geographical groupings which cannot be used to indicate source of material, publishing agency, or authorship (e. g., GA1 - Europe; DA2 - North America).

United States Numbers. Because of the multiplicity of United States federal, state, and local documents, special provision has been made for their arrangement.

The various sections of the U. S. Federal Government, with the exception of the Armed Forces, take the designation "A."

The Armed Forces take the following designations:

- A1 - Department of Defense
- A2 - Department of the Army (War Department, excluding Air Corps)
- A3 - Air Corps
- A4 - Department of the Air Force
- A5 - Department of the Navy

AA1 is the designation for the geographical area of the U. S. as a whole, or for any region of the U. S. which does not conform to, or come within the boundaries of, a single state or territory. Each state has been provided with a separate number, as have Alaska and Hawaii.

New York City has a separate number assigned to it (AN7). This has been done in order to adequately differentiate it from New York State (AN6) and to provide a simple notation for this entity because of its size and consequent prolific publications.

Subordinate Political Units. Each country number may be modified to form a county (province, prefecture, state) or a city number by the addition of .1 (county) and .2 (city).
Examples:

FE5	- England	DC2	- Canada
FE5.1Y6	- Yorkshire	DC2.1B7	- British Columbia
FE5.2L6	- London	DC2.2T6	- Toronto

In the United States it is the individual state number which is so modified. Examples: AT4 - Texas
AT4.2F6 - Fort Worth

Application to Serial Documents. Examples to illustrate the application of Table G to serial documents (W 2):

United States

W 2 U. S. Army. Air Corps. Matériel
A3 Division
M4te Air Corps technical report

W 2 Connecticut. Dental Commission
AC8 Biennial report
D4b

Foreign

W 2 Gt. Brit. General Register Office
FA1 Studies
G3s

W 2 Toronto. Department of Public Health
DC2.2 Report
T6D4r

Application to Hospital Serials. Hospital serial documents (WX 2) are cuttered to arrange the titles geographically within the class and to identify each hospital. Decimal subdivisions .1 and .2 for subordinate political divisions are not used but a notation is added to represent the city. Examples:

Civilian hospitals

WX San Francisco. Franklin Hospital
2 Report
AC2
S2F8r

WX Denver. Children's Hospital
2 Annual report
AC6
D4C5a

WX Ireland (Eire) Hospitals Commission
2 General report
GI6
H8g

Civilian hospitals bearing the names of Saints

WX Elmira, N. Y. St. Joseph's Hospital
2
AN6
E4SJ8

WX Albany. St. Peter's Hospital
2
AN6
A3SP4

U. S. military hospitals. Named hospitals have fixed locations and are cuttered the same way as civilian hospitals except that the military symbol precedes the geographical notation. Numbered hospitals do not have fixed locations and geographical notation is not applied to them.

WX U. S. Army. Bushnell Army Hospital,
2 Brigham, Utah
A2U8
B7

WX U. S. Army. 125th General Hospital
2
A2
125

Application to Monographs. Table G is used to express geographical groupings for subjects in the AML CLASSIFICATION. When LC CLASSIFICATION numbers are used, the geographical breakdowns provided in the LC schedules are to be applied.

Table G is used for monographic titles on a broader basis than for serials. For example, a history of medicine limited to one city, or to one section of a country, takes the geographic notation for the country, except that the state designation is used for material limited to a U. S. city, county or state.

WZ 70 GF7	History of medicine in Paris
WZ 70 AO7	The doctor in Oregon
WZ 70 AO7	Pages from the medical history of Klamath Falls
WZ 70 AA1	History of medicine in the southwestern states
W 275 HU5	Health insurance plan of Capetown

TABLE G

I. SUMMARY

- A - U. S. Federal (as author)
- AA1 - U. S. (as geographical area)
- D - America
- F - Great Britain
- G - Europe
- H - Africa
- J - Asia
- K - Australia, New Zealand
- L - Islands of the Pacific Ocean and Indian Ocean
- M - International
- P - Polar Regions (for monographs only)

II. UNITED STATES (FEDERAL GOVERNMENT)

- A - U. S. (as author)
- A1 - Department of National Defense
- A2 - Department of the Army

- Hospitals and dispensaries devoted to internal medicine
 - *27 Collective (Table G)
 - *28 Individual (Table G)
- 50 Medical practice (Table G)

- *100 General works (including Medical emergencies)
 Example: Tice. Practice of medicine
- *120 Popular medicine (General)
 e. g. Household medical books
 Example: Fishbein. Modern home
 medical advisor
- 130 General works for laymen
 Classify here books on general medicine
 written in style suitable for laymen. Example:
 Clark. Medicine on the march

GENERAL DIAGNOSIS

- *141 General works
 Cf. QY 4 General works on clinical
 pathology
- 142 Prognosis
- 143 Symptomatology
- 146 Asthenia. Cachexia. Fatigability. Collapse
- 152 Chills. Fever
- 158 Dehydration. Edema
- 176 Pain
- 182 Syncope. Coma
- 200 Physical diagnosis (General)

GENERAL DIAGNOSIS

- 205 Technique of physical examination
- 270 Temperature
- 275 Inspection. Palpation
- 278 Auscultation. Percussion
- 280 Blood pressure
- 282 Pulse
- 284 Respiration
- 290 History taking
- 293 Collections of clinical case reports
 Classify here miscellaneous collections.
 Classify case report(s) limited to one disease
 with disease

THERAPEUTICS

- *300 General works
- 330 Drug therapy Cf. QV

THERAPEUTICS

- 340 Administration of medicines
- 342 By inhalation
- 344 By rectum
- 350 By mouth
- 354 By veins and subcutaneous tissue
- 356 Blood transfusion
- 365 Various other therapeutic and diagnostic procedures
- 369 Acupuncture
- 371 Cupping. Counter-irritation
e. g. Mustard plasters
- 373 Paracentesis
- 375 Thoracentesis. Pericardial puncture
- 377 Spinal, cisternal and ventricular puncture
- 379 Biopsy
- 381 Leeching. Venesection

THERAPEUTICS

- 400 Dietetics. Dietotherapy
- 405 Dietary cookbooks
- 410 Special methods of feeding
 e. g. Rectal. Duodenal
- 420 Fasting
- 426 Meat diets
- 428 Milk diets
- 430 Vegetable diets. Fruit diets
- 432 Raw food diets
- 433 Beverages
- 438 Coffee. Tea. Chocolate
- 442 Water. Mineral waters
- 444 Wines. Liquors. Cordials
- 447 Miscellaneous food fads and food preparations

THERAPEUTICS

- 460 Physical medicine. Physical therapy
- 465 Thermotherapy (General)
- 467 Heat therapy
- 469 General application
 e. g. Fever therapy
- 471 Local application
- 473 Cold therapy
- 480 Heliotherapy. Phototherapy
- 495 Electrotherapy
- 510 Diathermy
- 520 Hydrotherapy
- 525 Balneotherapy
- 535 Mechanotherapy
- 537 Massage
- 541 Exercise. Medical gymnastics
 Cf. QT 255 Physical education
- 545 Rest
- 550 Therapeutic use of music
- 555 Occupational therapy

THERAPEUTICS

- *700 Geography of disease
 - 710 Diseases of geographic areas
 - 720 Diseases of ethnic groups
 - 740 Weather and disease
 - 750 Climatotherapy Cf. WF 330
 - 760 Health resorts (Table G)
- *880 Special cures and cults
- *885 Faith cure. Christian Science healing
- 890 Miscellaneous treatments
 - e. g. Biochemic medicine
- *900 Special systems of therapeutics
 - Use for material on subject or theory of system. Classify treatment of particular disease with disease (e. g. Chiropractic treatment of scarlet fever, classify in WC 214 Scarlet fever)
 - 905 Chiropractic
 - 920 Eclecticism
 - 930 Homeopathy
 - 940 Osteopathy
 - 960 Other systems
 - e. g. Naturopathy

Classify material on infectious systemic diseases in WC. Classify material on an infection which affects a single organ with the organ.

- *1 Societies
- *3 Congresses
- Collections
 - *5 By several authors
 - *7 By individual authors, A-Z
- *9 Addresses. Essays. Lectures
- *11 History (including history of single infectious disease) (Table G)
- *13 Dictionaries. Encyclopedias
- *15 Classification. Nomenclature
- *16 Tables
- *17 Atlases. Pictorial works
- *18 Study and teaching
- *20 Research
- *22 Directories (Table G)

- Laboratories, institutes, etc.
- *23 Collective
- *24 Individual, A-Z
- *25 Laboratory technique. Methods
- Hospitals, clinics, dispensaries, etc.
- *27 Collective (Table G)
- *28 Individual (Table G)
- [32] [Laws]
- Classify laws relating to infectious diseases
 under appropriate topics in WA Public Health
- *100 General works
- *140 Venereal diseases
- *142 Control measures
- *144 Prophylaxis
- *150 Gonorrhea
- Classify Gonorrhea in the female in
 WP 157
- *155 Chancroid
- *160 Syphilis
- *161 Congenital
- *162 Primary. Secondary

Venereal diseases

Syphilis (Continued)

- *164 Tertiary
- *165 Cerebrospinal
- *168 Cardiovascular
- *169 Gummatous lesions
- *170 Treatment
- *180 Granuloma inguinale
- *185 Lymphogranuloma venereum
- *195 Infectious fevers (General)
- *200 Bacterial diseases
- *202 Pneumonias (all types)
- *204 Pneumococcal pneumonia
- *207 Virus pneumonias
- *209 Other
 - e. g. Friedländer's disease
- *210 Streptococcal infections
- *212 Tonsillitis. Septic sore throat
- *214 Scarlet fever

Bacterial diseases

Streptococcal infections (Continued)

- *220 Rheumatic fever. Chorea in
 rheumatic fever
- *230 Focal infections
- *234 Erysipelas
- *240 Bacteremia. Septicemia
- *245 Meningococcal infections
- *250 Staphylococcal infections
- *255 Wound infections
- *260 Enteric infections
- *262 Cholera
- *264 Epidemics
- *266 Paratyphoid fevers
- *268 Bacterial food poisoning
- *270 Typhoid fever
- *280 The dysenteries
- *282 Bacillary dysentery
- *285 Amebic dysentery. Amebiasis

Bacterial diseases

Enteric infections (Continued)

- *290 Other
 e. g. E. coli infections
- *302 Actinomycosis
- *305 Anthrax
- *310 Brucellosis
- *320 Diphtheria
- *330 Glanders
- *335 Leprosy
- *340 Pertussis
- *350 Plague
- *355 Epidemics
- *370 Tetanus
- *375 Gas gangrene
- *380 Tularemia

- *400 Spirochetal diseases
- *405 Rat-bite fever
- *410 Relapsing fever
- *420 Weil's disease
- *425 Yaws
- *450 Mycoses
 - *460 Coccidioidomycosis
 - *465 Histoplasmosis
 - *470 Moniliasis
 - *475 Other
 - e. g. Thrush. Hemisporosis
- *500 Virus diseases
 - *505 Respiratory tract
 - *510 Common colds
 - *515 Influenza
 - *520 Mumps
 - *522 Infectious mononucleosis
 - *525 Psittacosis
 - *526 Pappataci fever
 - *528 Dengue

Virus diseases (Continued)

- *530 Yellow fever
- *532 Epidemics
- *536 Infectious hepatitis
- *540 Neurotropic virus infections
- *542 The epidemic encephalitides
- *550 Rabies
- *555 Poliomyelitis
- *570 Dermatotropic virus infections
- *572 Chickenpox
- *575 Herpes zoster
- *578 Herpes simplex
- *580 Measles (Rubeola)
- *582 German measles (Rubella)
- *585 Smallpox
- *588 Vaccination
- *590 Epidemics
- *600 Rickettsial diseases
- *602 Trench fever

Rickettsial diseases (Continued)

- *605 Typhus fever
- *610 Epidemics
- *615 Endemic (murine) typhus
- *620 Rocky Mountain spotted fever
- *625 Other tick-borne rickettsial fevers
e. g. Q fever
- *630 Scrub typhus
- *635 Other mite-borne rickettsial fevers
e. g. Rickettsialpox
- *640 Oroya fever
- *680 Tropical diseases (General)
- *695 Parasitological diseases
- *700 Protozoan infections
- *705 Trypanosomiasis
- *715 Leishmaniasis
- *725 Toxoplasmosis
- *730 Coccidiosis
- *735 Ciliate infections
e. g. Balantidiasis

Protozoan infections (Continued)

- *750 Malaria (all types)
- *755 Incidence. Distribution
- *765 Control measures
- *770 Treatment
- *800 Helminthic infections
- *805 Trematode infections
- *810 Bilharziasis
- *815 Schistosomiasis japonicum
- *825 Cestode infections
- *830 Tapeworm infestation
- *838 Cysticercosis
- *840 Echinococcosis
- *850 Nematode infections
- *855 Trichinosis
- *860 Trichuriasis. Oxyuriasis
- *865 Strongyloidiasis
- *870 Ascariasis
- *880 Filariasis

Helminthic infections

Nematode infections (Continued)

- *885 Onchocerciasis
- *890 Hookworm infestation

- *100 Deficiency diseases
 - 105 Malnutrition
 - 110 Vitamin A deficiency
 e. g. Night blindness
 - 120 Vitamin B deficiency
 - 122 Beri-beri
 - 124 Riboflavin deficiency
 - 126 Pellagra
 - 140 Vitamin C deficiency (i. e. Scurvy)
 - 145 Vitamin D deficiency (i. e. Rickets)
 - 150 Vitamin E deficiency
 - 155 Vitamin K deficiency
 - 175 Sprue. Idiopathic steatorrhea
- *200 Diseases of metabolism (General)
 Classify Diabetes in WK; Gout in WE 350;
 others in WR
- *210 Obesity
- 212 Popular works

- 220 Disturbances of acid-base balance
- 222 Acidosis
- 226 Alkalosis
-
- *300 Diseases of allergy (General)
 - Classify Asthma in WF 553; Hay fever in WV 335; Dermatitis in WR 140
- 310 Food allergy
- 320 Drug allergy
- 330 Serum sickness
-
- *400 Animal poisoning
 - 405 Marine forms
 - 410 Reptiles
 - 420 Spiders. Scorpions. Centipedes. Leeches
 - 430 Insects
-
- *500 Plant poisoning
 - 505 Ergotism
 - 515 Favism
 - 520 Mushroom poisoning
 - 530 Snakeroot poisoning
 - e. g. Milk sickness

- *600 Diseases due to physical agents
Classify Burns in WO 704
- 602 Electric shock
- 610 Heat prostration. Heat exhaustion
- 630 Motion sickness
e. g. Seasickness
- 650 High air pressure. Submarine medicine

AVIATION MEDICINE

- 700 Aviation medicine
Classify Aerotitis media in WV 235; Vision
in WW
- 705 Personnel selection and fitness. Physical
standards
- 710 Altitude effects
- 712 Explosive decompression
- 715 Oxygen deficiency
- 720 Motion. Acceleration
e. g. "G" effect
- 730 Psychiatric aspects
- 735 Fatigue

- *1 Societies
